

It's much harder to piece together every investment he's made over his career. No one talks about the dud picks, the ugly businesses, the poor acquisitions. But they're a big part of Buffett's story. They are the other side of tail-driven returns.

At the Berkshire Hathaway shareholder meeting in 2013 Warren Buffett said he's owned 400 to 500 stocks during his life and made most of his money on 10 of them. Charlie Munger followed up: "If you remove just a few of Berkshire's top investments, its long-term track record is pretty average."

When we pay special attention to a role model's successes we overlook that their gains came from a small percent of their actions. That makes our own failures, losses, and setbacks feel like we're doing something wrong. But it's possible we are wrong, or just sort of right, just as often as the masters are. They may have been *more right* when they were right, but they could have been wrong just as often as you.

"It's not whether you're right or wrong that's important," George Soros once said, "but how much money you make when you're right and how much you lose when you're wrong." You can be wrong half the time and still make a fortune.

There are 100 billion planets in our galaxy and only one, as far as we know, with intelligent life.

The fact that you are reading this book is the result of the longest tail you can imagine.

That's something to be happy about. Next, let's look at how money can make you even happier.
