

It also shows GEM combined with a 30% permanent weighting to aggregate bonds in order to create a more conservative portfolio for more risk-averse investors. GEM can, in this way, be a program for all seasons and for many different investors.

Table 8.10 Global Equities Momentum, Leveraged and Deleveraged

	Ann. Return	Annual Std Dev	Annual Sharpe	Maximum Drawdown	% Profit, Months
GEM 130	20.13	16.43	0.81	-29.84	65
GEM	17.43	12.64	0.87	-22.72	68
GEM 70	14.52	9.50	0.90	-15.46	69
