

Action Step 3

Confirm Your Target

If you've read this far, you probably have a good idea of the amount of wealth you want to accumulate. But in case you haven't, I have a tool to help you.

It's called the R:IQ. Provide some basic information, like your annual income, how much money you'll need each month to live out your dream, and how much you've already invested, and the tool will calculate how much you need to save every month from now until you hit your wealth target.

You can adjust the number of years you want to work, the rate of return you think you'll earn on your investments, and the withdrawal rate (the percentage of your money you'll use each month).

It's free. It's easy to use. And it gives you an HD-clear number to work toward.

Go to www.chrishogan360.com/riq/ and take the R:IQ.

What's your number?
