

Height and width combinations. The combination of height and width yields results that make your head itch. Consider the bull market results. The numbers say that tall patterns outperform and wide patterns outperform. So you'd think that patterns both tall and wide, on average, would outperform. Noooo! Tall and narrow ones do best (but tall and wide is close).

The bear market numbers are flubbed up, too. Clearly, though, avoid short and narrow patterns. They perform worst.

[Table 42.6](#) shows volume-related statistics.

[Table 42.5](#) Size Statistics

Description	Bull Market	Bear Market
Tall pattern performance	−20%	−23%
Short pattern performance	−13%	−22%
Median height as a percentage of breakout price	15.4%	22.8%
Narrow pattern performance	−15%	−22%
Wide pattern performance	−18%	−23%
Median width	60 days	61 days
Short and narrow performance	−13%	−21%
Short and wide performance	−14%	−24%
Tall and wide performance	−20%	−22%
Tall and narrow performance	−21%	−24%
