

If you want to make a 10% profit above a 5% commission and fees (15% total), 27% of the horns in bull markets and 41% in bear markets will fail to meet your profit objectives.

[Table 43.4](#) shows breakout-related statistics.

Breakout direction. By definition, the breakout is always upward. If you have a horn that does not break out upward, then it's not a horn (or you haven't waited long enough).

[Table 43.3](#) Cumulative Failure Rates

Maximum Price Rise (%)	Bull Market	Bear Market
5 (breakeven)	70 or 6%	36 or 9%
10	124 or 18%	57 or 23%
15	92 or 27%	74 or 41%
20	95 or 35%	36 or 50%
25	81 or 43%	23 or 56%
30	67 or 49%	26 or 62%
35	61 or 55%	26 or 68%
50	129 or 67%	54 or 82%
75	117 or 77%	38 or 91%
Over 75	243 or 100%	36 or 100%

[Table 43.4](#) Breakout and Post-Breakout Statistics

Description	Bull Market	Bear Market
Breakout direction	100% up	100% up
Performance of breakouts occurring near the 12-month low (L), middle (M), or high (H)	L 59%, M 52%, H 63%	L 38%, M 33%, H 29%

Yearly position, performance. The best performing horns in bull markets have breakouts within a third of the yearly high (suggesting a momentum play: buy high, sell higher). You'll want to stay out of the middle third.
