

Table 51.5 Size Statistics

Description	Bull Market, Up Breakout	Bull Market, Down Breakout	Bear Market, Down Breakout
Tall pattern performance	56%	−18%	−26%
Short pattern performance	39%	−13%	−25%
Median height as a percentage of breakout price	8.3%	9.6%	13.0%
Narrow pattern performance	42%	−15%	−26%
Wide pattern performance	54%	−17%	−25%
Median width	55 days	55 days	50 days
Short and narrow performance	37%	−14%	−25%
Short and wide performance	44%	−12%	−23%
Tall and wide performance	57%	−19%	−25%
Tall and narrow performance	54%	−17%	−28%

Height and width combinations. Looking at the combination of height and width, you would expect patterns both tall and wide to perform best because those traits do well individually. The table shows that is indeed the case. Tall and narrow works best in bear markets, which agrees with their individual traits, too (meaning tall patterns outperform and narrow patterns outperform so the combination of tall *and* narrow outperforms).

You might think these results would be obvious, but sometimes the individual traits don't lead to better performance when you combine them.
