

Description	Explanation
	completing a throwback or pullback.
Performance with breakout day gap	The average rise/decline for those patterns <i>with</i> gaps on the day of breakout. This uses the opening price the day <i>after</i> a gap as the entry price in the measure to the ultimate high or low.
Performance without breakout day gap	The average rise/decline for those patterns <i>without</i> gaps on the day of breakout.
Average gap size	For patterns with breakout day gaps, this is the average height of the gap.

Table x.5 Size Statistics

Description	Explanation
Tall pattern performance	The average rise/decline for patterns taller than the median height.
Short pattern performance	The average rise/decline for patterns equal to or shorter than the median height.
Median height as a percentage of breakout price	The median of the height divided by the breakout price.
Narrow pattern performance	The average rise/decline for patterns equal to or narrower than the median width.
Wide pattern performance	The average rise/decline for patterns wider than the median width.
Median width	The median width from pattern start to end.
Height and width performance	The average rise/decline for the four combinations of pattern height and width.
