

ones actually do best for both up and down breakouts. You'll want to avoid trading short diamonds (either wide or narrow). They perform worst.

[Table 23.6](#) shows volume-related statistics.

Volume trend. Diamonds having a falling volume trend most often. Do not discard a diamond because volume trends upward.

Rising/Falling volume. Upward breakouts with a falling volume trend show a two-percentage-point performance advantage compared to those diamonds with a rising volume trend. Downward breakouts favor a rising trend for better performance, but the difference is small.

[Table 23.5](#) Size Statistics

Description	Up Breakout	Down Breakout
Tall pattern performance	48%	−22%
Short pattern performance	31%	−16%
Median height as a percentage of breakout price	10.9%	12.1%
Narrow pattern performance	38%	−19%
Wide pattern performance	41%	−19%
Median width	34 days	37 days
Short and narrow performance	28%	−17%
Short and wide performance	37%	−15%
Tall and wide performance	42%	−21%
Tall and narrow performance	58%	−24%
