

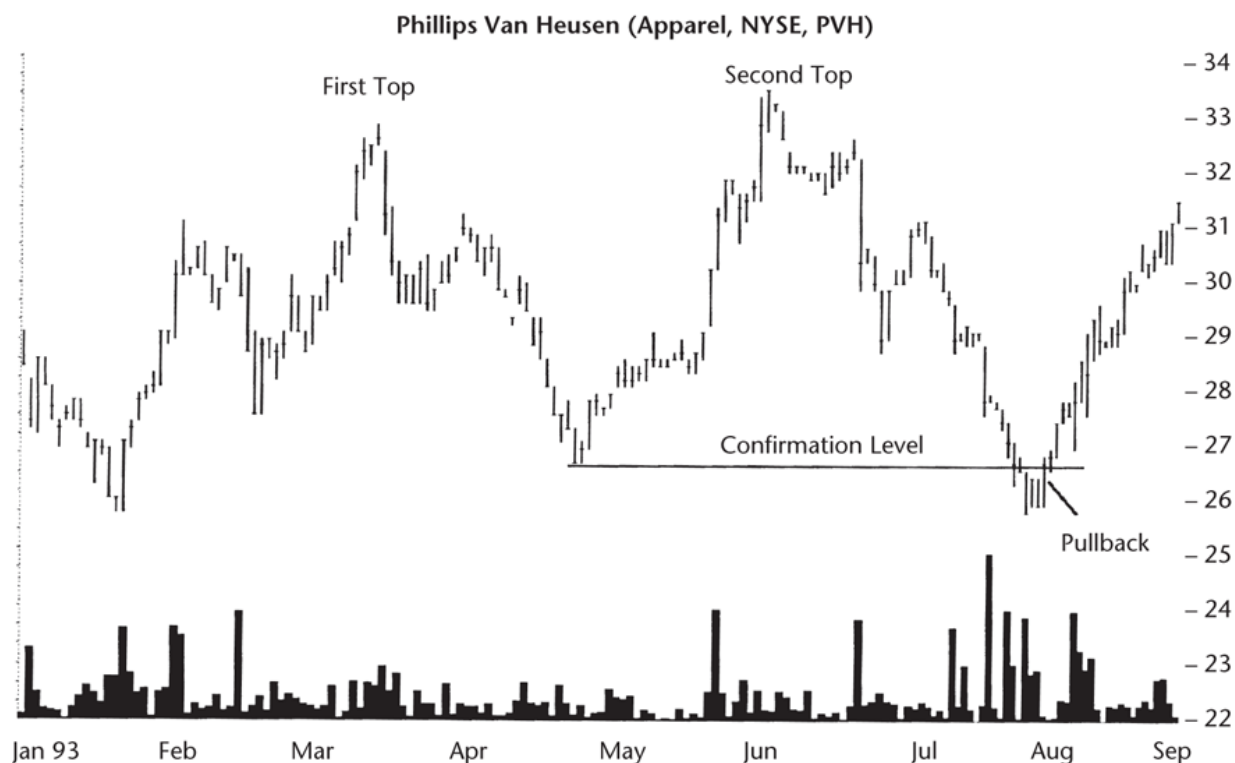

Figure 30.5 A double top pattern that suffers a 5% failure. Price fails to continue moving down by more than 5% before rebounding.

Statistics

Table 30.2 shows general statistics.

Number found. I discovered 1,282 patterns in 656 stocks starting from July 1991 to March 2020. Not all stocks covered the entire period, and some no longer trade. Because few patterns appeared in bear markets, I removed them from this edition. The number found reflects that change.
