

PART ONE

Frugal Living

Frugally used to be a dirty word, reserved only for those who reused paper plates and refused to tip at restaurants.

Now that saving money is a trendy subject, gracing the front pages of nearly every major magazine and newspaper, frugality is finally catching on.

You won't catch us telling you how to painfully squeeze the last drop out of everything in life. We won't be suggesting that cheap is synonymous with thrifty. In fact, if you are living a truly frugal lifestyle, you'll only appear to be paying top dollar for the finer things in life, even as your wallet stays fat and happy.

We want to guide a new generation of money-conscious readers—one that oozes class, loves having fun, and knows that life is exactly what you make of it (and not how much you make).

We'll tackle food, entertainment, health, and education. And of course, we'll share the best ways to shop with what you have, not what you wish you had. By finding like-minded friends to share your frugal lifestyle, you won't be missing out on a thing. (Except maybe that high-balance credit card bill.)
