

of books they should order, and this could be a huge opportunity for you and other homeschool families.

5. Internet resources

If you are a worksheet kind of instructor, you'll be pleased to find many printables online for all grade levels. Some websites may charge an annual fee in exchange for high-quality worksheets and lesson plans. Others can give you the same kind of access for free, if you're willing to put up with a few ads and limited ownership rights.

6. Scholastic book clubs

I will always remember getting the book order forms at school, looking them over with big plans for acquiring paperbacks, and then having my parents tell me "no." Homeschool parents can sign up for the same ordering info from Scholastic's website (Scholastic.com) and get order forms for as many grade levels as you teach. They have some great deals throughout the year, and there are no minimum ordering levels. If you do purchase \$25 or more, however, you get free shipping and some fine promotional perks. With each dollar spent, you will accumulate "points" that can be redeemed for future purchases.

In addition to getting some nice classic paperbacks at school pricing, users can access some inexpensive mobile games.

The Scholastic teachers' site also has a good selection of seasonal printables, including answer keys.

7. Craigslist.org

No resource list would be complete without my current shopping addiction. Granted, you will need to weed through listings for mint condition copies of *Playboy* and tattered boxed lots of V. C. Andrews, but if you check early and often, there are deals to be had at Craigslist (Craigslist.org).

8. Garage sales

Those parents especially dependent on concrete plans and tight deadlines might not appreciate the beauty of a surprise curriculum find at a garage sale. There are no guarantees that homeschool curriculum will even be mentioned in the sale ad. You just go, dig through books, and see what you find. I have gotten boxes and boxes of books for quarters, just by asking. If the family seems to be the type that might homeschool, ask! (Usually the lab equipment, early childhood
