

- Scoop up glass with cardboard or paper, and use sticky tape to pick up small fragments.
- Place remnants in a sealable plastic bag and take outdoors to a trash receptacle. Do not leave indoors.

Dimmer switches make a slight difference in energy usage as well. An expert from Florida Power & Light Company (FPL) says dimmer switches extend the life of any bulb, especially if they're a newer model.⁸ Dimmable CFL's can save even more, but make sure the package says dimmable before trying it. Many CFL's are surprisingly not.

READER TIP:

Keep the fridge/freezer full so that they don't work as hard. If they're full, the frozen items keep each other and the freezer cold. We also have an extra fridge in our basement so even if we aren't using it for loads of food, we fill it with water bottles.

5. PRACTICE EFFICIENT HOUSEHOLD HACKS

For even more energy savings in your home, here are a few daily habits you should try to practice every single day:

- Set your hot water heater to 120° or below.
- Only let your dishwasher run when it's completely full, and skip the dry cycle. Open up to let dishes air dry.
- Change the air conditioner filter every thirty days so it doesn't have to work as hard.
- Wash a full load of laundry, and wash in cold water whenever possible.
