

DAY 18 ACTION PLAN

- Take a few minutes to research walk-in clinics closest to your home, and pop the number and address into your phone's contact list so you'll always have it with you.
- Call your insurance company so you know which hospitals are considered in-network for your plan.
- If you have a medical bill you still owe money on, find out what an average procedure cost is for your area, then call the hospital to negotiate a lower rate.
