

The biggest way you can save on cleaning supplies is to make your own from scratch using everyday household ingredients. White vinegar, borax, rubbing alcohol, baking soda, dish soap, and water can do wonders when mixed in the appropriate measurements. Plus, you can find all sorts of empty spray bottles in different sizes at the dollar store.

Pinterest is filled with DIY knockoffs for just about every cleaning solution available, but here are a few of my favorite recipes:

Streak-Free Window Cleaner

- 1/3 cup white vinegar
- ¼ cup rubbing alcohol
- 3½ cups water
- 1 clean 32-ounce spray bottle

Multipurpose Cleaner

- 1½ pints water
- 1/3 cup rubbing alcohol
- 1 tsp clear household ammonia
- 1 tsp mild dishwashing liquid
- ½ tsp lemon juice
- 1 clean 32-ounce spray bottle

Upholstery Cleaner

- 6 Tbsp soap flakes
