

DAY 9 ACTION PLAN:

- If you don't know how much money you're currently spending on groceries, do some math to come up with a final total. Then commit to trying one of the above methods and lower that amount by \$25/month to start.
- Go through your pantry, fridge, and freezer and come up with seven meals you can make without going to the store. Use the Shop Your Stock Worksheet to help.
- Track prices and write them down in your own price book. Try to pay attention to sales cycles and any available coupons too!
