

with more brochures and TV promotions devoted to the former. In fact, our so-called thrift institutions would be better understood if they were called debt institutions, since the current level of public saving is at its lowest in modern American history, while public borrowing approaches infinity.

In the end I decided to keep my stake in an existing Centrust checking/savings account that paid a floating rate of interest above a minimum balance with no penalty for early withdrawal. That accomplished, I considered the next course of action.
