

Endnotes

Clearly, the topics of debt, mortgages, and prudent leverage have been in the news lately, and one cannot overemphasize the extent to which this issue is intertwined with personal housing. The article by Goetzmann (1993) provides an accessible approach to treating real estate and one's home as part of the asset allocation decision. The book by Evensky and Katz (2006) contains a collection of articles, many of which deal with issues relating to debt and borrowing as part of the personal capital structure.
