

MOSHE A. MILEVSKY, PH.D.,

lectures at the Schulich School of Business, where he earned his Ph.D., and has been nominated for teaching awards. He is Executive Director of the IFID Centre, a nonprofit corporation that is dedicated to research at the intersection of wealth management, personal finance, and insurance.

Dr. Milevsky has published five books and over fifty peer-reviewed articles on pensions, insurance, investments, derivative pricing, and retirement income planning. He co-founded the *Journal of Pension Economics and Finance*, authored *The Calculus of Retirement Income*, and has delivered seminars at the London School of Economics, The Wharton School of the University of Pennsylvania, University of Michigan, and universities throughout Europe, South America, and Asia.

Dr. Milevsky recently received a Graham and Dodd scroll award from the CFA Institute in recognition of his research on comprehensive life cycle investing, and in 2006 he was co-awarded a U.S. patent for inventing techniques designed to optimize asset allocation during retirement through the use of life annuities.
