The physical production of this book was an exhaustive task, as it is Elliott Wave International's longest book and contains over two hundred charts. I am deeply grateful for the efforts of Jane Estes, who oversaw production at every level, Karen Latvala and Sally Webb, who flowed text, entered editing changes, and helped in proofreading, and Leigh Tipton, assisted by Betsy Forrester, who patiently attended to the countless details of graph production. Peter Kendall spent numerous hours chasing down data and finding specific passages in issues of *The Elliott Wave Theorist*. In helping produce our publication every month since 1983, Dave Allman over the years researched much of the data for the book, and then oversaw chart production. Susan Willoughby meticulously developed the book jacket from a design by the author. Thanks also to the stock market not only for teaching us patience, but for maintaining its bull trend long enough to get this book out as it continues to rise in record high territory.

*This book is dedicated to my wife Robin,
who graciously indulged my seclusion while writing,
and to my wonderful friends at Elliott Wave International.*
