

## USEFUL SERVICES

A number of firms in addition to Elliott Wave International provide services that are suited to turbulent times and provide value by reaching beyond the conventional wisdom. I highly regard all of these services, but as I lack omniscience about their futures, none can be guaranteed. It will be your job to assess their value (or lack thereof) to you. Needless to say, there are additional analysts and services for whom I have the utmost respect and whose opinions I value highly. However, many of those are substantially oriented to stock selection, which while valuable in most market environments, may be incompatible with the upcoming one. Listings are alphabetical.

### MARKET TIMING AND ANALYSIS PUBLICATIONS
