ports (see Chapter 6), the NASDAQ index, and the S&P Composite index (see Chapter 8) are rapidly nearing long term resistance lines as well, supporting the case for an approaching stock market top. Finally, as discussed earlier in this chapter, the Grand Supercycle and Millennium degree advances are well within their ideal target ranges, bringing the number of degrees calling for an imminent top to five.

The upper parallel lines in Figure 2-6, which are drawn from the orthodox and post-orthodox tops of wave ③, are shown dashed because meeting them would force a large penetration of the highest resistance line at Supercycle degree (shown in Figure 2-5), an
