

“Seeking market truth is more important than following market fictions. If you believe in life insurance, burglar alarms, vaccinations and preventive medicine — and you are an investor — *At the Crest of the Tidal Wave* is a must read for you.” — Julian Snyder, Editor, *International Moneyline*

“In his first book, *Elliott Wave Principle*, Bob provided insights to the stock market for the last 15 years. In *At the Crest of the Tidal Wave*, Bob provides the road map for the next 15 years.”

— Tom Joseph, President, Trading Techniques and
Developer of GET Elliott Wave software

“Robert Prechter is one of the sharpest financial minds I’ve ever met. *At the Crest of the Tidal Wave* is must reading for every investor. This book is a strong dose of reality for a world that increasingly bases investment decisions on fantasy.” — Richard Maybury, President, Henry-Madison Research

“For *any* investor whose net worth exceeds the price of this current masterpiece, *At the Crest of the Tidal Wave* is an absolute BUY and HOLD. It is the convergence and epitome of courage, experience, fact, analysis, reflection and the knowledge of history, applied to preparing for one’s future. Agree or disagree, Bob’s work is to be respected, absorbed, and constantly reflected upon.”

— Guy N. Bacon, Jr., V.P. Investments, Dean Witter Reynolds

“Once in a great while you come across a book you know you should listen to. This is one of them. If fact, it was gripping; I couldn’t put it down. My own area of expertise, chaos and complexity theory, also suggests we are on the cusp of a tidal wave, but the obviousness of Prechter’s argument and the clarity of his numbers — those amazing numbers — made me a believer for the first time. Put aside all those optimistic economic fairy tales, look at the evidence and face the implications of the change that lies ahead.”

— Dr. S.J. Goerner, Director,
Triangle Center for the Study of Complex Systems

“Prechter’s in-depth analysis of the secular ebbs and flows in global financial markets is must reading for any serious investor. Knowing long term risks and opportunities in financial markets ahead of time is absolutely the key to consistent investment success.”

— Felix Zulauf, Zulauf Asset Management, Zurich
