

In the End

The employees are paid as per time. Hence, people come and go on time. You do not know if they are contributing towards the success of the business during that period. Especially when people are working remotely, it becomes essential to clearly define deliverables for the roles.

If deliverables are clearly defined then why do you need to pay based on the number of hours? Can't we just pay based on deliverables? This is the baseline for the Gig Economy. We will discuss the payment of salary in the next chapter.

Measure time, you will get time.
Measure delivery, you will get delivery.
