

You already know that talent mobility is important for business. It improves retention, productivity, and helps in filling positions faster. In this chapter we will discuss the importance of maintaining hygiene when facilitating organizational movements. Let's start by defining the hygiene definition of transfer.

Transfer

Transfer is a process of horizontal movement of an employee. The transfer may result in change of job, location, division, or function without any significant change in compensation, designation or responsibilities. The compensation might be adjusted based on the cost of living adjustment (COLA) if a location change is involved in the transfer.
