

4. Exit Interview

The exit interview is conducted to gather the feedback from the employee. The focus of the interview is to understand the reasons for exit. It helps in designing interventions to prevent the exit of more employees for the same reasons. You should also confirm the future communication address and contact details.

5. Separation

The employee is separated on the last working day. You may decide to blacklist employees being separated due to misconduct or integrity issues to avoid rehiring of such employees in the future.
