In the End

Although this may appear to be a lengthy list, it is actually quite manageable to maintain compliance and ensure the smooth operation of your business. All these compliances ask you to ensure basic needs of a human being. The knowledge of the acts and their context makes you smarter and keeps your organization out of trouble. Generally organizations employ a compliance agency to fulfill the compliances. This knowledge will help you to have a meaningful discussion with the agency. If you have interest in the subject, you should read the acts to learn the finer details.

The compliance with laws mitigates regulatory, reputational and financial risks. We will discuss mitigation of another important risk in the next chapter.

Laws are the guide rails to create a balance.
