

2. Talent Acquisition Platform

The talent acquisition platform was introduced in the 1990s and gained popularity in the 2000s. The talent acquisition platform typically has the following components. These components are also available as independent platforms.

a.

Application Tracking System (ATS)
To track and process applications for recruitment.

b.

Career Portal
To post jobs and attract talent.

c.

Assessment Platform
To assess candidates for the job.

d.

Onboarding Platform
To enable compliance and experience of new joiners.

The Develop and Engage areas of HR management were covered by the Talent Management platform.
