

2. Research

Find HR tech products available in the market and compare them on:

a. Features

Do not count features. See them in context of your requirements.

b. Cost

The cost structure may also give you surprises. Do not forget to check

i. Upfront Investment

One time amount to be paid for buying software.

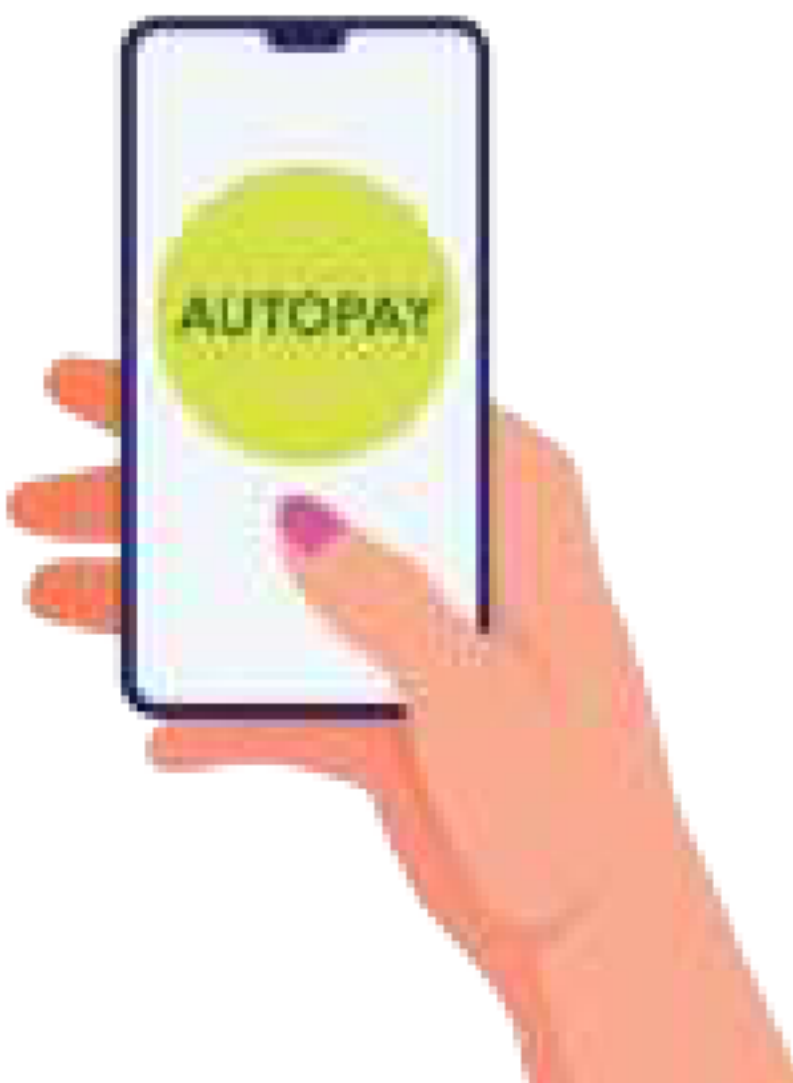

ii. Implementation Cost

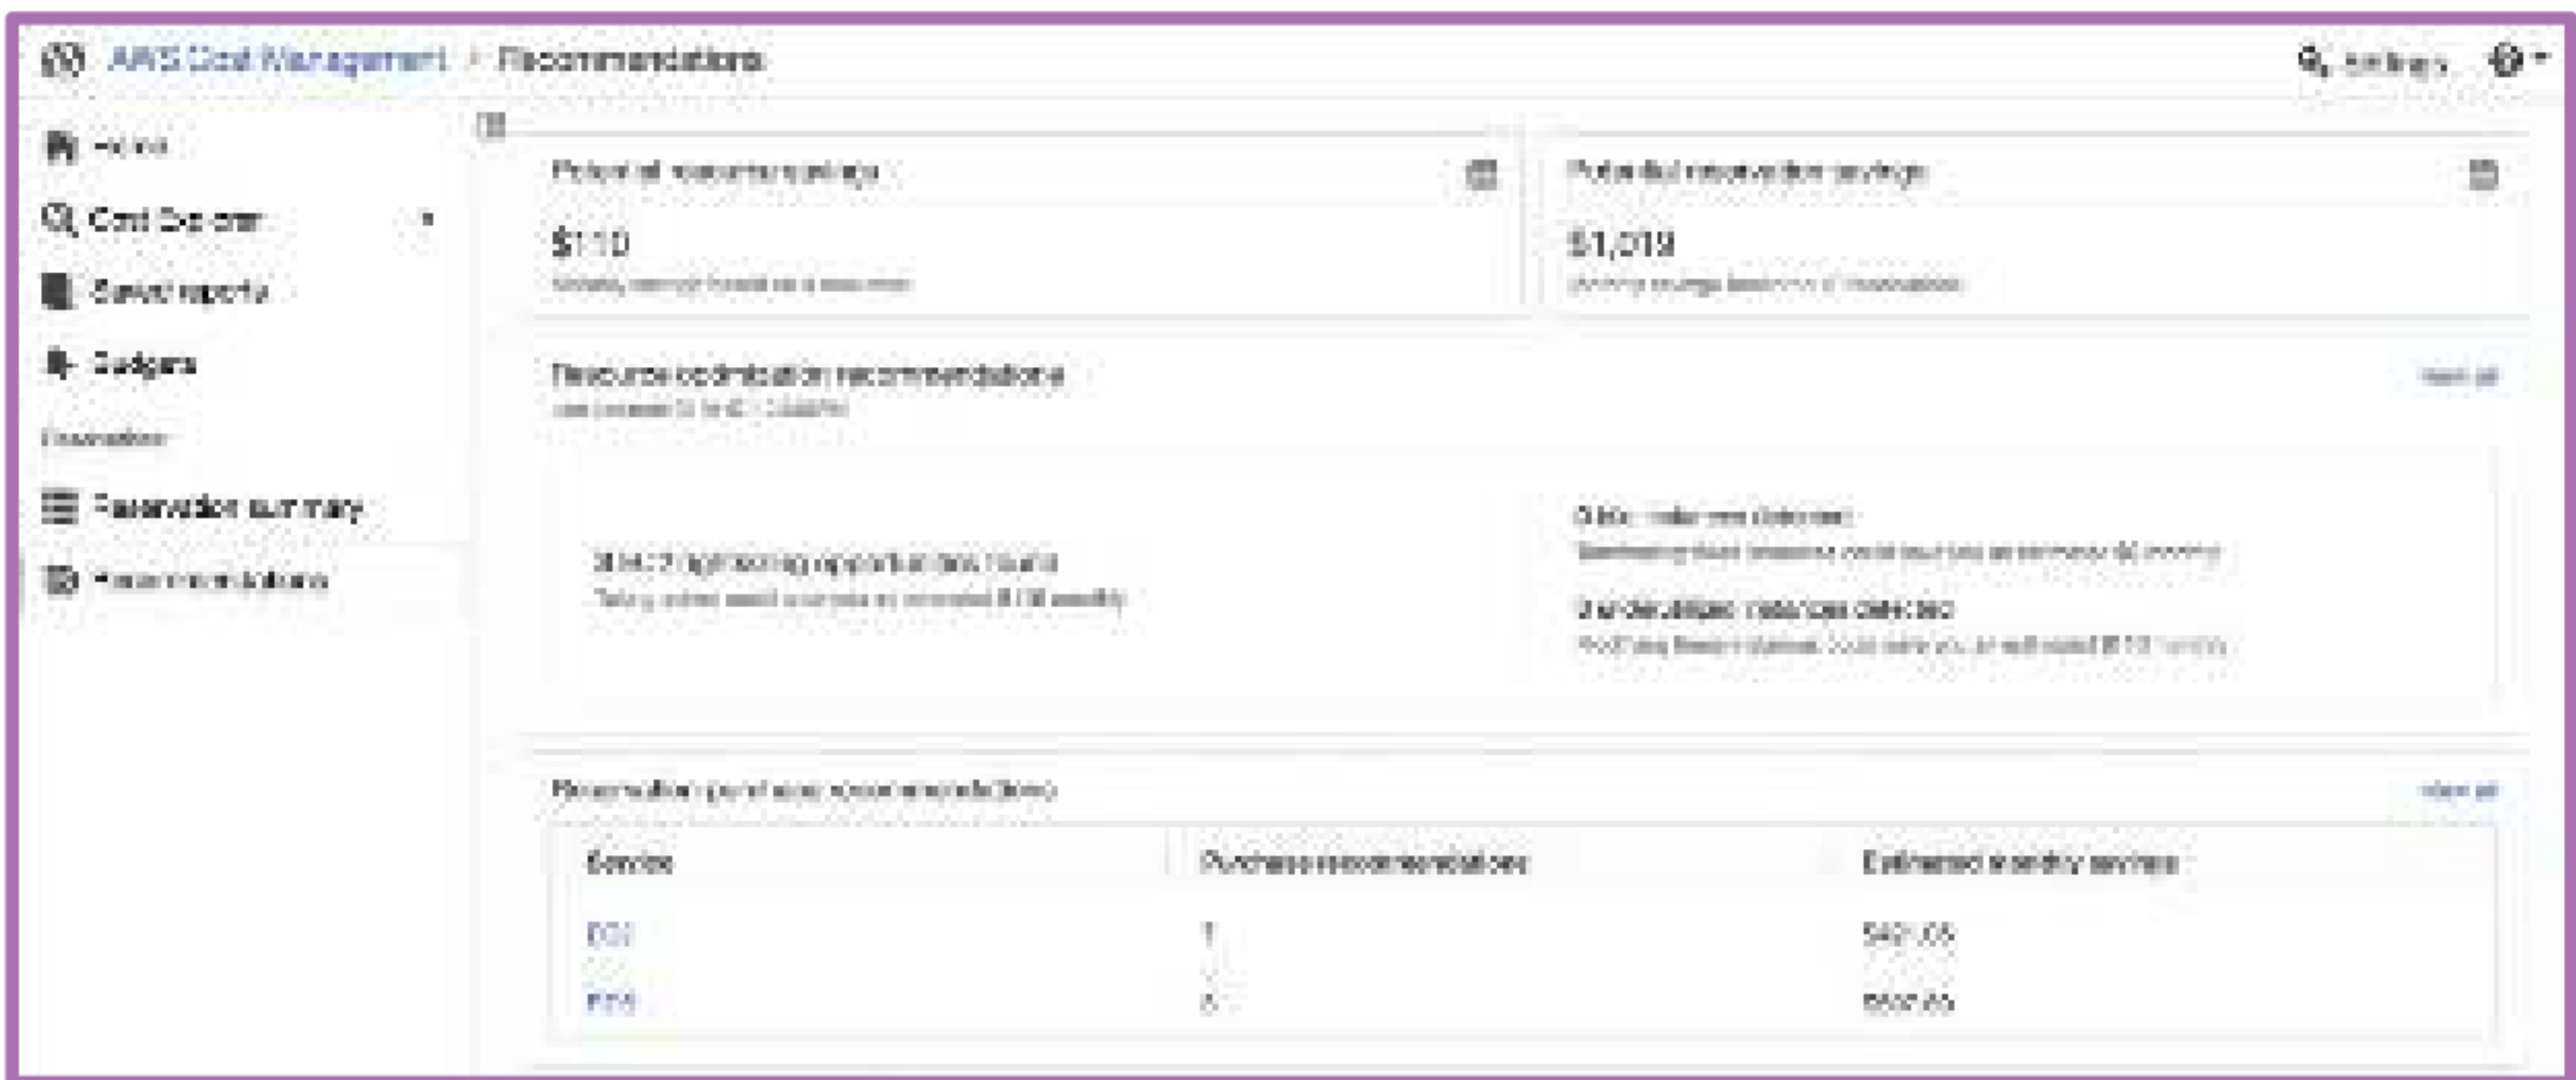

Cost incurred for implementing the software. It is generally a consulting fee for people setting up software for you.

iii. Maintenance / Subscription fee

Annual maintenance fee or the monthly subscription charges for the software.

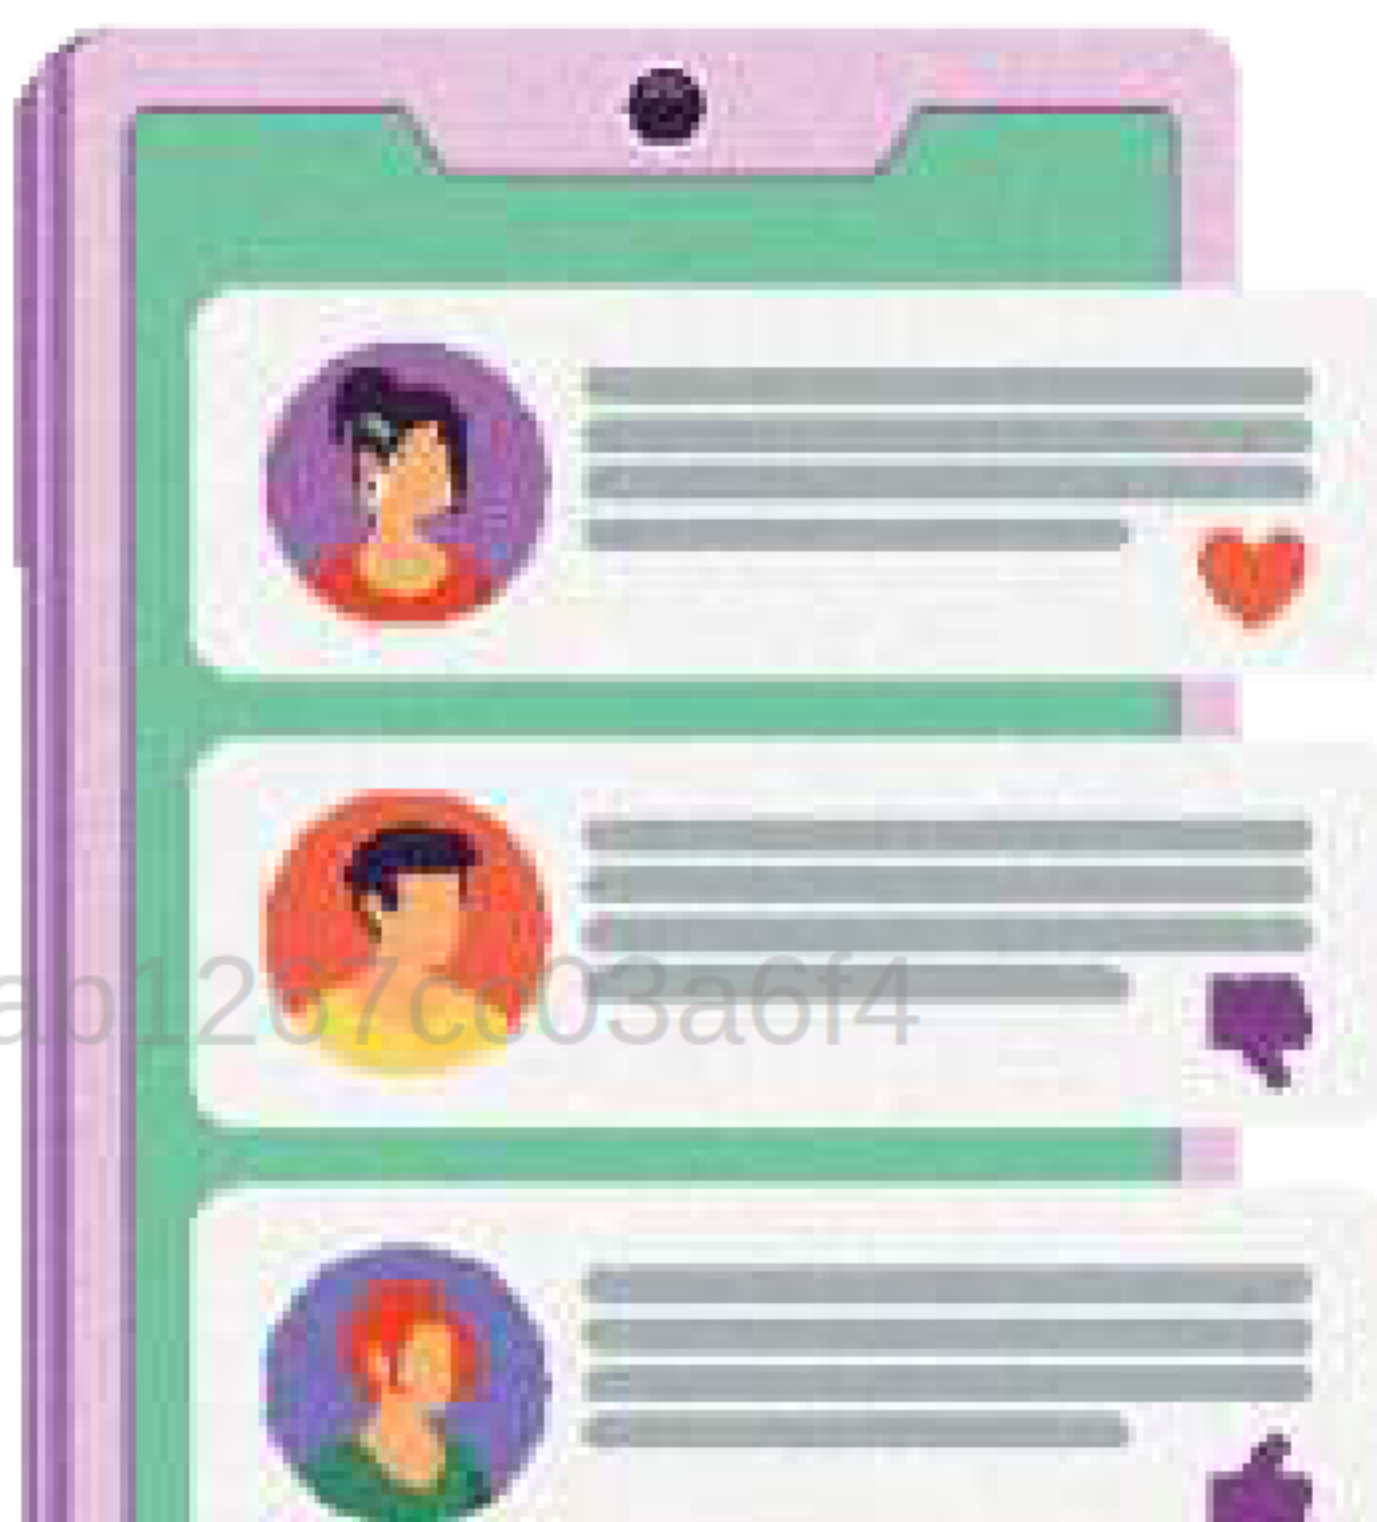

iv. Hardware Cost

The cost to be incurred on hardware (server / computer) for running the software. There are two types of setups - on premise or cloud based. The “on premise” setup requires you to spend money on buying hardware. The cloud based software runs on leased servers. The rent of the servers is inbuilt in the monthly subscription fee of the software.

c. User Reviews

Do connect with at least two customers to understand their pain points with the product.
