

In the End

Once an HR platform is implemented, it becomes the lifeline of the organization. Ensure that there is always someone available to support the platform. It can be the person from the platform service provider. It is a good idea to have a dedicated person on the HR team from your side. You must understand that the quality of the HR platform is as good as the quality of the data you input into it.

We will discuss master data management in the next chapter.

Select what you need instead of what you want.

Hands-on HR

Here are some hands-on questions for you to apply what you have learnt in this chapter.

1. Research Talent Assessment Platforms

Conduct an internet research to find 10 Talent Assessment platforms available in the market.

2. Shortlist three Assessment Platforms

Shortlist three assessment platforms for conducting coding tests in python and java. Compare the features, price and user reviews.

You may use software advice (<https://www.softwareadvice.com/hr/assessment-comparison/>) for finding and comparing platforms.

3. Prepare Blueprint

Prepare blueprint for a Learning Management System for an organization of your choice. You may use the SAP template for preparing a blueprint.
