Still all wisdom comes from data. You must ensure that your data is safe, secure and is of good quality. These are called the key data requirements.

Key Data requirement

As an HR expert, you must be sensitive to the key data requirements and proactively work towards defining norms for

- 
1. **Data Security** - Safeguard organization data. Whether you maintain physical employee files (although you should not) or digital data, keep them in lock and key.
 2. **Data Privacy** - Encrypt sensitive personal information like Aadhar Number, Date of Birth, Bank Details, Mobile Number that can be used to commit frauds by falsifying the identity of an individual.
 3. **Data Quality** - Maintain quality of data for meaningful analysis using data standards. Only 3% of the organization data meets the basic quality standards (ABC example).
 4. **Data Loss** - Eliminate possibility of data loss. Create backup.
 5. **Data Retention** - Preserve the data of your employees and transactions in line with the regulatory requirements. Here the key requirements
