Apart from the key data requirement, you must know about the various types of HR Master Data that exist in the organization.

# Types of HR Master Data

The Master data is the foundational data for any system. Here are the types of master data used by organizations. Since these data types build perception, they are called PERCEPTS

**Personal Data**  
includes name, address, gender, contact details etc.

**Employment Data**  
includes employment status, contract, job and location etc.

**Recruitment Data**  
includes data of candidates, assessments and offers.
