

Compensation Data

includes salary, overtime and benefits data.

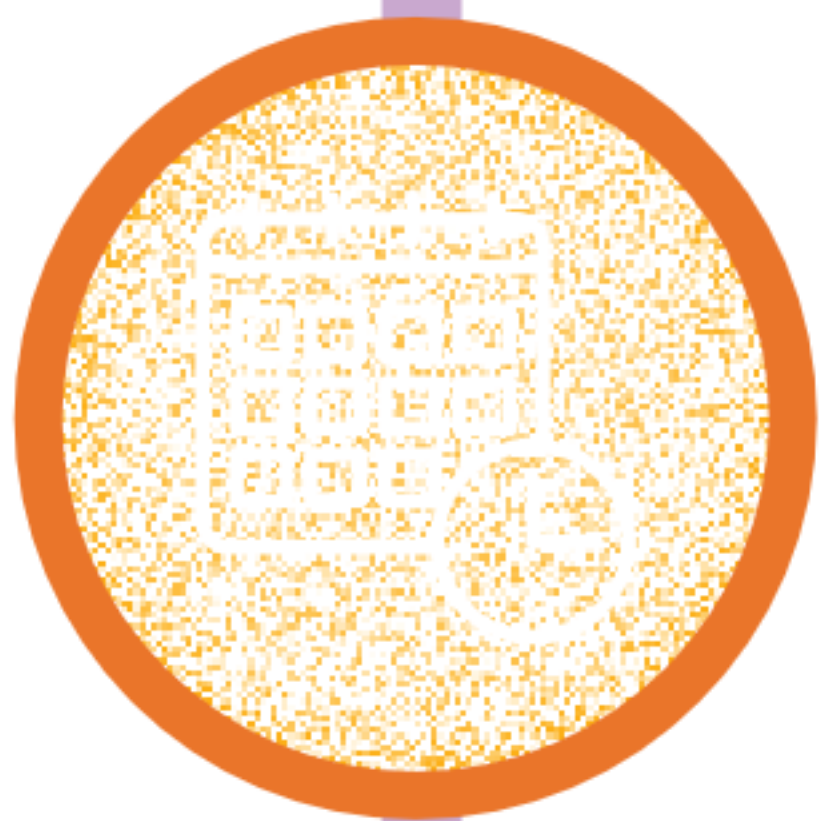

Engagement Data

includes employee feedback and perception data.

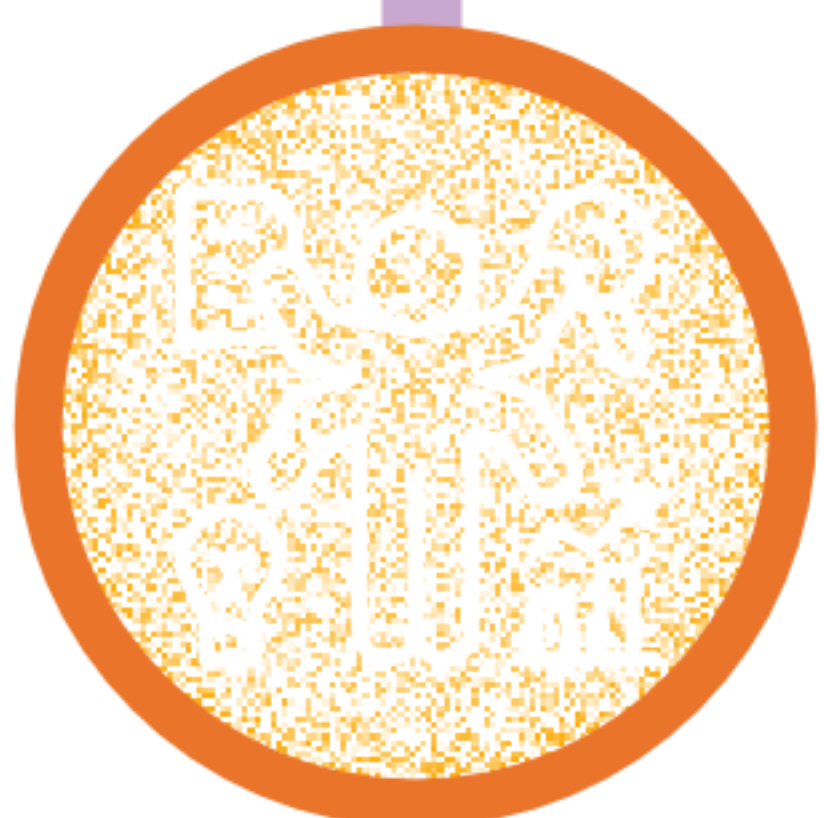

Performance Data

includes goals, performance and PIP data.

Time and Attendance Data

includes attendance and leaves data.

Skills Data

includes skills, learning certifications and development data.

In the End

As an HR expert you must ensure that employees complete and certify the mandatory data requirements at the time of joining. The mandatory data includes the data that is required for

- Processing Salary (Bank Details, PAN, Aadhar, UAN)
- Contact details (Phone, email, addresses)
- Career Progression (Education, Employment, Skills)
- Social Security (Family details, Nominations)

The key metric that measures the strength of your Master Data Management system is the utilization of data for organizational decision making. Likewise all the strength of the other HR processes can be assessed by using the metrics. We will cover the HR metrics in the next chapter.
