The scale and size of organizations is growing.

More than 10k employees

186

1999

1,222

2022

In 1999, there were 186 companies with more than 10,000 employees in the United States. In 2019, the number increased to 1,122.

192

2022

Even in India, the number of organizations having more than 10,000 employees was 192 in 2022. The scale and size increase the transaction volume. They also increase the complexity of the organization.

It becomes humanly difficult to handle such volume and complexity. Hence, artificial intelligence is invented to solve these problems.
