

After Sometime

- ➡ **AstroTalk**, an Indian astrology consultation platform, effectively utilised a funding announcement to implement a penetration pricing strategy. After securing a significant round of funding, AstroTalk strategically offered a limited-time promotion in which they provided free astrology consultation sessions to new customers.
- ➡ This promotion capitalised on the perception of credibility and value associated with receiving substantial funding. It created a buzz in the market, attracting a surge of new users eager to try their services without cost.

Identify the Right Communication Strategy

Creating a solid plan to promote your product starts with identifying your target audience's most effective communication channels. Understanding your audience persona will help determine what works best. Ask key questions like:

1. Do your target customers generally prefer accessing information and engaging with brands through online platforms, or do they depend towards offline channels?

2. Do your customers respond more positively to inbound marketing techniques, such as social media and content marketing strategies, or do they prefer outbound marketing methods, such as direct mail and telemarketing?
