

Paid Search

Paid search marketing, also known as pay-per-click (PPC), involves advertising directly on search engines like [Google](#).

Paid Search Marketing or Pay Per Click (PPC) advertises directly on search engine.

- ➡ With PPC (Pay Per Click), you create ads and pay for them to appear in search results when people search for specific keywords related to your business.
- ➡ You can place ads on partner websites and publishers. Unlike organic search optimization, where you improve the website's visibility naturally, PPC allows you to bid for placement in search results, increasing the likelihood of your ads being seen by searchers.
