

Avoid Decision Paralysis

This means not providing customers with too much information or options, which can make it difficult for them to make a decision. People generally prefer a smooth and straightforward shopping experience without unnecessary complexity.

For example, going to a **restaurant** with a concise menu versus pages of options on a simpler menu leads to quicker decisions.

Too Much Information

Elaborate Options

Precise Information

Concise Format

Just keeping the information concise and relevant can help customers stay focused and make decisions quickly, enhancing the overall shopping experience.

Win by Visuals

Startups are creating captivating designs, images, packaging, logos, ads, and layouts that grab their attention right away and leave a lasting impact. Studies show that 50% of their brains are highly used for processing visual information.

This creates a memorable impression in a very short period, often within milliseconds. Today, with a vast amount of information, having visually appealing marketing designs can help your brand stand out from the crowd.
