

Indirect Channel

Here, the service provider or manufacturer involves intermediaries such as **businesses, entities, vendors, partners, or third parties** in delivering the product or service to the customer. For example, companies like Nestle and Adobe Creative Cloud may use indirect channels by working with wholesalers, distributors, retailers, or online marketplaces to reach their customers.

The collaborative model involves forming mutually beneficial alliances or partnerships. This means while the company relies on intermediaries for distribution, it also establishes strategic relationships with other entities to enhance its distribution capabilities or reach new markets through joint promotions and co-marketing agreements.
