

I. Consultants/ Consulting Firms

Consultants and consulting firms provide specialised expertise to clients across various industries and domains. They are professionals who work closely with their clients to understand their needs, challenges, and goals and then offer solutions or recommendations to solve them. **For example**, if you need investment advice, you can visit an advisory services firm where they can understand your risk, willingness to invest, and several other factors, and then they can suggest investment options based on your needs.

J. Affiliate Marketers

Affiliate marketers earn commissions by promoting or selling products or services on behalf of another company. They typically do this through various marketing channels such as **websites, blogs, social media, email marketing, or other digital platforms**.
