

Business-to-Business (B2B) Model

In the business-to-business (B2B) model, businesses sell their products or services directly to other businesses rather than to individual consumers. [For example](#), a company that creates automobile parts would go to another business that is an automobile manufacturing company.

A. Manufacturers and Distributors

Manufacturers produce goods in bulk and sell them to distributors, who then distribute the products to retailers or other businesses.

[For Example](#) – [Automobile Parts Manufacturer](#): Bosch manufactures automotive components such as fuel injectors and sensors. They sell these parts to automobile manufacturing companies like BMW, Ford, or Toyota, who integrate them into their vehicles.

Electronic Components Manufacturer: Intel manufactures microprocessors and other electronic components. They supply these components to computer manufacturers such as Dell, HP, and Lenovo, who use them to assemble laptops and desktops.
