

This is exactly what the **Blue Ocean Strategy** is a business strategy that focuses on creating new market spaces rather than competing in existing markets. It involves differentiation and low costs to generate opportunities and demand. The goal is to create an uncontested market space where competition is less, which allows companies to establish themselves. The traditional view assumes market boundaries and industry structures are fixed. However, Blue Ocean Strategy challenges this notion by suggesting that these boundaries and structures can be reshaped through the actions and beliefs of the companies themselves.

New Market Space

Traditional Market -> Emerging Market -> New Market Space
