

6.4 Philip Kotler's Five Product Levels

Philip Kotler's Five Product Levels provides a framework for understanding a product beyond its core features and the problems it solves. He explains it in five chronological levels, each representing a different aspect of a product.

*Philip Kotler is a renowned marketing expert and author, widely regarded as the father of modern marketing. He has significantly influenced marketing theory, particularly with his concept of the "4 Ps" and his extensive work on consumer behavior and strategy.
