

Potential Product

Here, the focus shifts to future possibilities and innovations that can be integrated into the product. It involves making efforts to enhance the product by incorporating cutting-edge technologies and innovating new trends. Businesses explore new ideas and technologies that will revolutionise their products.

In the case of a smart phone, product features might include technologies like artificial intelligence and virtual reality. Hence, it enables them to innovate, adapt, and evolve in changing market dynamics.

**New Launch -
Virtual Reality**

**New Technologies,
Artificial Intelligence**
