

How can you Determine your Key Resources?

You need to ask yourself these major Questions

Physical Resources – What tangible assets (e.g., infrastructure, equipment, technology) are crucial for our business operations?

Human Resources – Do we have the right talent and expertise to drive innovation and success? How do we attract and retain skilled employees?

Intellectual Assets – What unique knowledge, patents, algorithms, or intellectual property give us a competitive advantage?

Financial Resources – How do we secure funding and manage financial resources to sustain and expand operations?

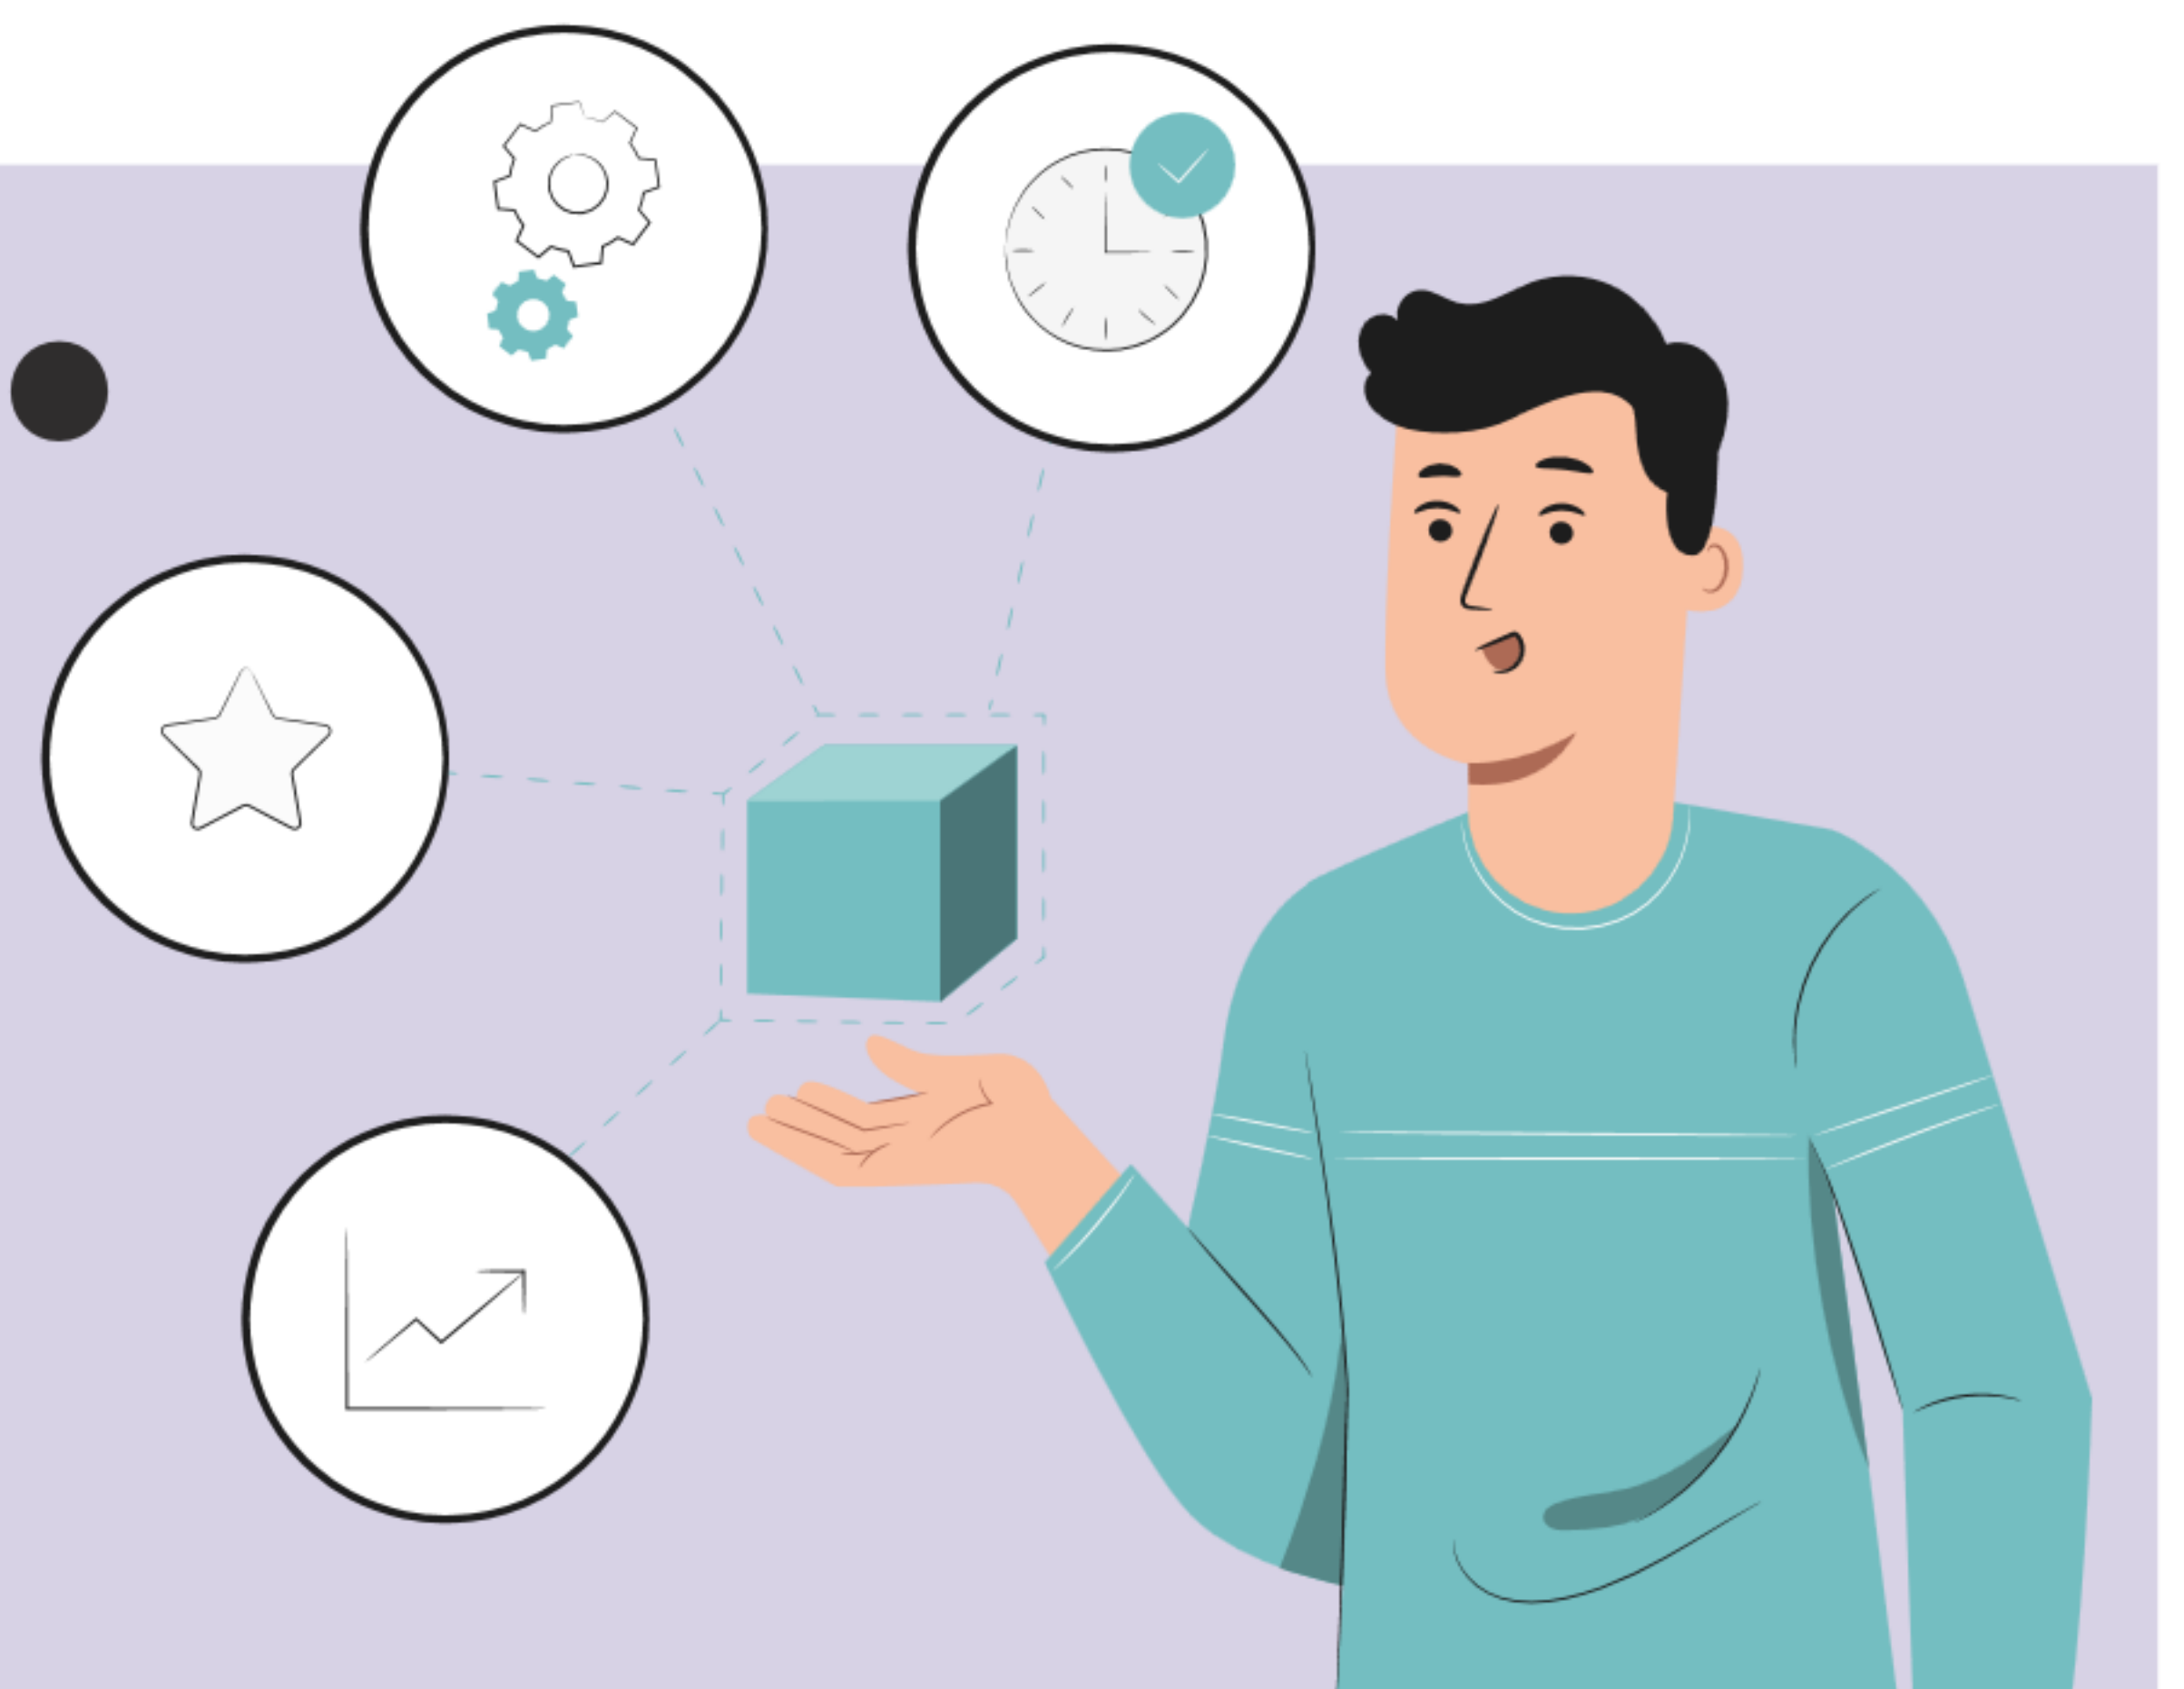

6. Key Activities

Key activities include the essential tasks and processes a company must undertake to deliver its value proposition, ensure operational efficiency, and build strong customer relationships.

To identify critical activities for your business, consider the following:

1.

Product Development and Innovation

How do you create and enhance your products or services?
