

➤ Challenges of Passion-Driven Ideas

If you are madly driven about your passion, blind passion can make it difficult to let go of ideas that fail to generate profits and are not financially viable.

This emotional attachment can lead to the idea being pursued even if it is not feasible.

The focus of this idea is not to solve specific problems or meet someone else's needs.

Instead, it's self-oriented, where you pursue activities that bring personal fulfillment and joy, regardless of whether they address a broader need or serve a specific purpose for others. This approach can help you enjoy your passions and interests, even if it won't solve anything.

Passion Driven

Personal Fulfillment

Personal Goals

When you discuss ideas with others, they might disagree with your opinion. You are so passionate that you are less likely to consider changing anything in the plan. The reason is emotional attachment, which leads you to stick with your plan.
