

What are the early warning signs or indicators of each risk?

It involves identifying early warning signs or indicators for each risk and highlighting specific signals or triggers that may indicate the onset of a potential risk or crisis. Startups can implement monitoring systems to detect risks and mitigate their impact.

How can we mitigate or prevent each risk from occurring?

It includes mitigating or preventing each identified risk, which involves developing strategies and measures to minimise its likelihood or impact. This helps startups reduce the likelihood of risks occurring and minimise their impact on the business.
