

2. Growth Framework

CRED

Business Model

CRED is a user-friendly app designed to help users pay their credit card bills while offering a visually appealing experience.

Business Partnerships

CRED collaborates with businesses to provide exclusive deals and rewards to its users. When users pay their credit card bills through the platform, they unlock special offers and benefits.

User Payments

Users can also refer the app to others, helping CRED grow its customer base organically.

CRED Mint

Launched in 2021, CRED Mint allows users to lend their idle money to other members with good credit scores. The process is transparent, requiring minimal credit checks while enabling users to earn interest on their funds.

Revenue Streams

Listing Products & Offers: Businesses pay CRED to showcase their products and promotions on the platform. When users engage with these offers, CRED earns revenue.

Financial Data Utilisation

CRED leverages user financial data to create personalized offers and services. It monetizes this data by providing banks and financial institutions with insights to better target their customers, creating a mutually beneficial ecosystem.

Growth Highlights

Founded in 2018, CRED has achieved remarkable milestones. In April 2021, it became a unicorn startup, reaching a valuation of over \$1 billion after securing \$215 million in a Series D funding round. By April 2021, CRED controlled 22% of India's monthly credit card payments, solidifying its market presence. The company continued its rapid growth, processing \$6.5 billion in payments in 2022 and raising an additional \$200 million in funding.^{[1][2]}
