

Consumer and Gap Analysis

Who are your competitors?

Next, identify what sets your product or service apart by examining factors such as differentiation, innovation, pricing, quality, and branding. By understanding your competitive advantage, you can better position yourself in this market.

Do you know consumer demographics?

Knowing consumer personas means knowing in detail about the target customer's demographic and behavioral aspects. This will help you understand customer preferences, enabling you to design your product accordingly.

Are you targeting the right stakeholders?

This involves identifying and engaging key decision-makers, influencers, and end-users who are directly impacted by the problem. Understanding their needs and pain points will help uncover market gaps and shape an effective solution.

Is this a problem you're committed to solving for the long run?

A strong market opportunity should be sustainable and worth your long-term effort. Ask yourself: Will you stay motivated to build and grow this business over time, or might you lose interest?

Analyse these questions and evaluate them.

2.2 Product Development Cycle

Many iterations are required for improvement and achieving right fit before final launch of startup.
