

Startupology

Customers play different roles and are in different situations throughout the day, so it's essential to consider those too. By understanding all these aspects, businesses can create products and services that truly meet customers' needs and make their lives better.

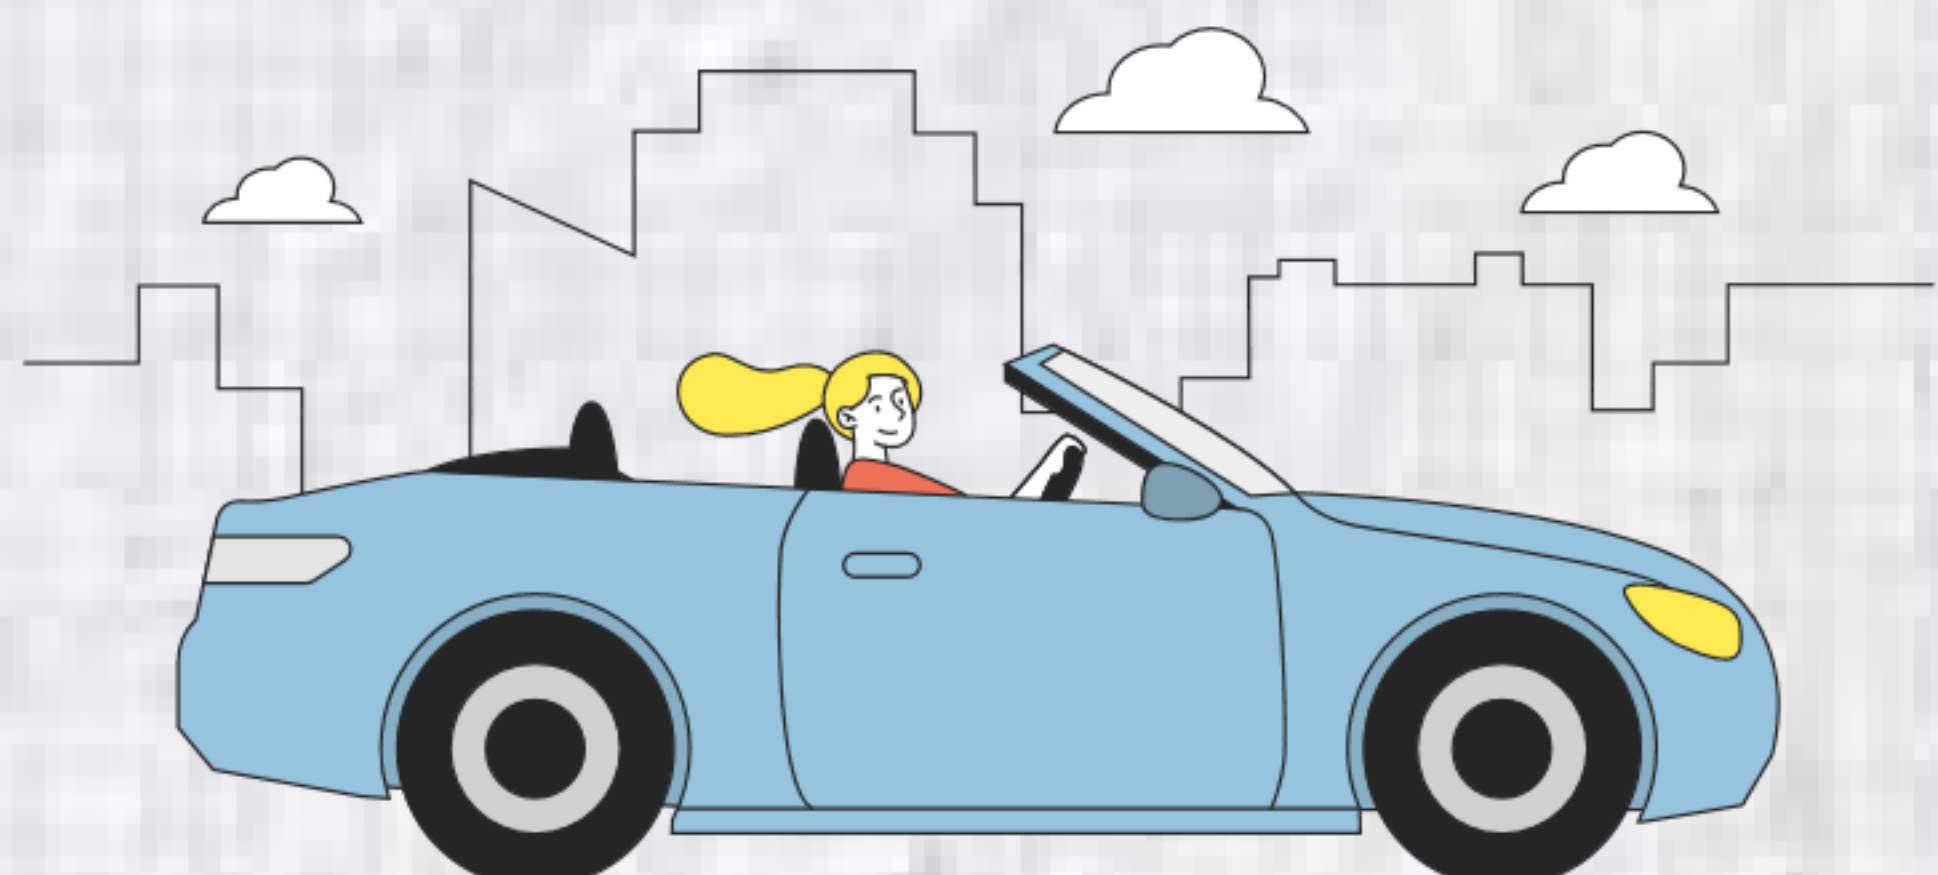

➤ Pains

Customers experience frustration when obstacles disrupt their ability to accomplish tasks efficiently. Common pain points include unexpected costs, risks, and errors that lead to wasted time and effort. They may struggle with complex processes, making mistakes that have unwanted consequences. Unmet expectations, delays, and inefficiencies create stress, while external factors like long wait times or lack of support add to their frustration.

Understanding these challenges helps design solutions that minimize friction and enhance the overall customer experience.
