

C. **Scaling your Business Growth**

If more businesses want what you offer, that is, if demand is growing, then can you keep up without sacrificing quality or spending too much? Consider if you can expand to other places without running out of resources and money. You want to make sure that growing won't cause issues with how well you can do your work or how stable your finances are when dealing with other businesses.

1. **Maximizing Profitability**

Demand (Target Market)	Supply (Availability of resources/ services)	Operating Cost (Total cost of making your service reach the end-user)	Profitability
Local	Local	High	Low
Global	Local	Low	Very High
Global	Global	High	Risky
