

3.4 Strategies to Build the Right Founding Team

The founder and other co-founders with complementary skills have the goal of transforming the original idea into a successful business. A strong business model is both repeatable and scalable, ensuring long-term viability. This involves the search for product-market fit, and that there is demand for the product or service they are offering.

The focus should be on testing various aspects of the business model, such as pricing strategies, distribution channels, customer acquisition, partnerships, and cost structures. These allow them to enhance the business model for sustainable growth.
